Join @Ytricks2 on Telegram channel Hotstar MOD APK (Premium Unlocked) is one of the most popular streaming player applications in the world. You can find the most popular sports and TV shows in India. Introduce about Hotstar What do you usually do in your free time? When there is time, some people choose to read, some people choose to go to coffee to chat with friends, some people play sports. However, there are many people (including me) who choose to watch movies every evening or on weekends. Yes, movies have long been a recreational need for many. It's convenient, bringing lots of information and new things you don't even need to go far. And now that Hotstar is available, you don't need to find on the web to find movies anymore. Virus or malware worries are completely gone. The best video streaming app for Android One of the reasons people switch to using mobile devices to watch TV more is because of the good 3G / 4G / WiFi connection speed. On the other hand, because the developer offers good services, has a stable connection speed and unlimited bandwidth for even the free releases. Novi Digital is not outside of what I just mentioned above. They have a large content distribution network, automatically connecting users to the nearest server to get the fastest content transfer speed and best performance. What TV shows, movies and sports for free Most other applications of the same genre focus on just one segment that has been previously recorded in movies and TV shows. With the aim to reach more users, Hotstar owns a richer content store, including sports programs, online TV, or Premier League football matches. So, whether you're away from home, on a picnic, or in the car, don't miss your favourite show. Most films, TV shows or sports programs are copyrighted by Novi Digital. One of them is an exclusive release that you cannot find anywhere other than Hotstar. Live broadcast of Cricket and IPL 2022 matches in India are examples. You don't want to miss a football match of your favourite club, right? Friendly interface This is a matter of experience. If using an app makes you feel uncomfortable and difficult to find what you want, it's bad, even you never want to come back again. Fortunately, Hotstar is not like that. It has a nice interface, designed as a list of tags. You can scroll sideways to see more content. Clearly divided layouts, including suggested categories for new categories, trends, most viewed, and more. A nice feature is that Hotstar will save app usage history. If you spend a lot of time on a particular genre or a series, it will suggest similar genres/shows/movies. Languages Hotstar is a streaming application developed and focused on content in India. Therefore, you can experience eight languages, including Hin di, Bengali, Telugu, Malayalam, Tamil, Marathi, Kannada and English. If you want to change them, you can go to settings. If you want to receive Sub in more languages, you must sign up for the Premium plan. Discover more content with the Premium version Hotstar divides users into three categories with three service packages: free, VIP and Premium. In particular, the free package can only choose the default program, with the default sub language (or none). The VIP package has more content, including Bollywood TV shows, news shows, the latest Star TV and sports series. Finally, the Premium package receives all the features and content that Hotstar has. For languages, you can select Sub for default and English languages. Premium Features Unlocked Sports Pack Unlocked Disney+ Unlocked Remove Ads. We provide you with two MOD versions below the article. Because this application has restrictions for some Android devices, you should choose the version that is suited for your device. Specifically, the MOD version v1 works for most Android devices. If you use a Xiaomi phone, it may not work. You can try v2. Also, if the MOD version doesn't work, try Netflix by APKMODY right now! Download Hotstar MOD APK for Android Despite the 5-year development period, Hotstar has recorded achievements that few applications have. The rich content and good service have made Hotstar an indispensable entertainment app for many people. And here, right below this article is the download link. We have updated the latest version and edited a bit so you can use the free Premium package. Do not hesitate to leave a 5-star review and an encouraging comment.
