About Airlines Manager - Tycoon 2022 The management experience becomes completely real inside Airlines Manager - Tycoon 2021 when the player selects the corresponding time mode to start the game. Players will start the game with the basic steps in airport management and gradually expand the size of their facility to earn a lot of money. At the same time, there will always be requirements that you will need to take care of as it is also an essential part of driving your growth. IMPRESSIVE AIRPORT MANAGEMENT EXPERIENCE Players will experience an exciting way of playing but will require players to care about some of the mechanics of this game. When you see the name of the game, it is not a flight simulator but airport management where you will find ways to develop aspects of the airport to ensure a large number of guests stably. So even though it is a game with more idle gameplay, there are also challenges that you will need to overcome. At the beginning of the Airlines Manager, players will choose two game modes: Professional and Tycoon. These two modes will have similar gameplay, but one point that you will need to pay attention to is the passage of time inside this game. Specifically, for Professional mode, players will experience all the periods in a completely realistic way, but those who are not a patient should choose Tycoon mode. It will help you speed up time, and an hour in real life is equal to 7 hours in the game. BUILD YOUR FLIGHT ROUTE After carefully considering time mechanics, we begin to experience the management work with the early game tutorial. Players will be introduced to an essential factor that is the length of the airport in the game. Specifically, in the index of each aircraft, there will be a number representing the lines' number at which it will be able to take off. In other words, the airport will be divided into different lines, and if it is less than the required number, the aircraft is not suitable for your facility. After that, you will get yourself the right to choose the facilities and countries to place these facilities. All the information is essential, so besides the price, you also need to pay attention to the width of the airport and many other factors for comfort in use planes. After that, you will continue to build bridges for the first flight along with buying a modern and fully equipped aircraft like the Boeing 777-200. These jobs are straightforward to do if players pay attention. You will then begin to put your facility and aircraft into commerce to attract more customers and thereby carefully adjust fares according to the market. In addition, at the beginning of the game, you will have a large amount of money that you can invest in other routes and buy a new plane to achieve specific goals in the game. MANY GOALS THAT YOU CAN ACHIEVE Once you have completed a route, you will receive the desired number of passengers for each class on the plane. Then you will manually schedule these planes with absolutely exact hourly. As mentioned above, the time in the game will go faster if you can choose the tycoon, then after a week in the game, you will see some great numbers. Also, don't overlook the goals that you can accomplish inside this game. The performance of the mission is absolutely a necessity in addition to building a standard airport in the game. Specifically, players will spend time performing tasks associated with the development of the game's base. At the same time, the amount that you can get is not several thousand dollars but several million. So don't skip any quests, and you'll know what you need to do with your base through these helpful quests. BUILDING SERVICE ELEMENTS IN THE GAME In Airlines Manager, you will find two main ingredients you will need to take care of: money and research points. As you know, money will be significant in the early stages of the game because it opens you up to many routes, planes, and many other exciting elements. But after a while, when you reach a certain level of development, you will need to take care of service modes, employee skills, and many other factors. All will sometimes require a certain amount of research points. Research points are also given a certain amount when you start the game with 300 million gold coins. At the same time, these two factors will have a specific relationship that you will transfer the money you earn to exchange for a certain number of research points in the game. When it comes to a condition, you'll need to take care of your facility's interiors and the fleets of vehicles you associate with it to meet your customers' needs and improve the reputation of your airport. Reviews from users M M: EDIT: last reviewed this game in 2019. Deleted the app for a while and just downloaded it. It doesn't seem to have many new features and it looks like it has stagnated. As a suggestion, it would be nice to be able to simulate what it would be like to be a passenger on our airlines, e.g a feature that looks like an Expedia UI, but with a list of cities served, a 'search engine' for available flights with flight times, layover times etc. More airports pls! Juba? Ndola? One less star...??????: This is a pretty good game. Automates flights so you can go inactive for a long time. Only problem is advertisements never load. When I spin the wheel of travelcards, it tells me to watch an ad. I click and it doesn't show up. Now I'm stuck because that's my task.Amir Foster: I absolutely love this game but it recently has had a bunch of bugs. It stopped letting me get the daily gift. It won't let me get a new hub. I can no longer schedule flights, and it thinks I have no aircraft even though I have 6, and it also doesn't let me buy any. But overall it is a great game. alot better than some other games. But also I have experienced some issues with the livery creator. 4 starsJoseph McNair: Think about this game like fantasy sports for people into air travel, a little at a time over a long period of time, except there's no end to the season, ever. Just keep flying. Gameplay hasn't changed in 10+years and people from day 1 are still playing if that tells you anything. I think the creators set out to build a business simulator without using a single graph & as few spreadsheets as possible, instead displaying important info graphically which makes the game artistically beautiful.Adithya Raam Sankar: Extremely relaxing yet entertaining game. It doesn't demand constant attention like a few other similar ones. It helps in strengthening management skills by focusing on your thought process. It allows you to relish (at least partially) the passion for travel and exploring new places. Addition information about the airports will be helpful. Line number of runways, number of aerobridges, punctuality of take offs, etc.A Google user: The app would be fun, but it takes forever for anything to work. Clicking on "OK" or anything of the like takes a while to register and often doesn't go through and the app often crashes. I've tried it it both the full and tycoon and it seems to happen more in the tycoon. The longest I've played is about 3 minutes without it crashing.A Google user: Game works well with a few bugs. Currently cannot schedule airplanes. Paid for a new plane and a lease, but whenever I try to schedule a route, it just sits there and the scheduler never loads. Have to reset the game and try again, but it never loads. In addition, travel cards randomly disappear from my account without any use. These need to be fixed. Edit: emailed support and they fixed the errors within a few emails.A Google user: Favorite game on Android. Very possible to be #1 without spending a dime, but AM+ membership is very affordable and actually provides something of value. I've played this everyday since I downloaded it on 9/29/2019... can you please add a button to complete all deliveries that have already finished, currently they're all lumped together whether they're finished or not. It's frustrating ordering 40 planes and waiting on a research so you have to press deliver 40 times individually.A Google user: Other than the gameplay, the UI is so complicated. I actually prefer the old design. I had to reset my account with a Silver star just to learn everything from beginning again. Also, it feels so laggy and bad when scrolling across the map. It's very sensitive, not smooth, not accurate. The screen loads everytime you pick something from the menu like c'mon? I have to waste 10 secs everytime I click something?!A Google user: The tutorial alone was laggy and annoyingly slow. The tutorial in a game should give players a taste of what's to come deeper in the game. This game failed to give me the feeling it would get any better at all so I uninstalled. I know these games take time for the player to develop their airline, but that was not the reason for the rating. Uninspired and laggy presentation did. Caveat emptor.
